

Engineering Network

Profile

Sugar is produced mainly from sugar cane and sugar beet. But whatever your raw material, we can provide a sound engineering basis for your new plant or upgrade project.

We take a holistic approach in everything we do. Together with our customers, we develop concepts whose benefits win them over from the start. On this basis, we propose planning solutions that you will certainly want to implement. If you are looking for help in putting your plans into action, look no further than BMA for commitment and passion!

BMA is synonymous with integrated engineering. Which is why we use only the latest engineering and planning tools. Your projects are handled by local teams of engineers, our BMA Engineering Network.

The BMA Engineering Network is the favourite partner of plant operators and investors alike, in the planning of single plants, process stations or complete factories.

Strengths

Sugar process expertise

Proven expert knowledge of processes and methods, from raw materials to final products.

A range of solutions

Engineering for final products such as sugar, ethanol or co-generation.

Compliance with local regulations

Solutions that take into account local circumstances, and national technical regulations and standards, delivered in your language.

Performance

Solutions from BMA set standards in quality, energy efficiency and reliability.

145

ENGINEERS AND PLANNERS IN THE BMA ENGINEERING NETWORK.

Technical data

BMA AG	40	BMA Autom.	26
BMA Russia	70	BMA America	02
BMA China	01	Total:	145
BMA MENA	04		
BMA Brazil	02	(Last updated: 07/2016)	

Reference extract

Customer	Year	Country	Services
Al Nouran	2016	Egypt	Basic and detailed engineering beet sugar factory
Dafeng Yinmore	2015	China	Basic & detailed engineering new sugar refinery
Cassa Group	2015	El Salvador	Optimisation concept Izalco & Chaparrastique factories
Someshwar	2015	India	Basic engineering new cane sugar factory
Sunabel	2015	Morocco	Energy study in Ksar El Kebir beet sugar factory
Etihad	2013	Iraq	Complete planning refinery
